Web Specs

Purpose

This is a website for my aunt's upcoming book, *Haiti Fights Back: The Resistance of Charlemange Pèralte*. We wanted this site to be both a place for my aunt to sell her book, and a place for people to learn the history of Pèralte and the US occupation of Haiti. To help her sell the book, there will be pages for an about the book section, an about the author section, a product page where people can buy the book, and an events page listing book signings and other events. To help teach the history, there will be a page with a timeline of the events as told in the book, and a contact form where people can ask questions.

Content

- Product page to buy the book
- Calendar of events
- Contact Form
- Timeline of history discussed in book
